#### Additional notes

- This is a simply devised meal plan that shows one way of meeting the new recommendations in practice – it is not, however, the only or definitive approach
- For purposes of the modelling:
  - Tea and coffee are unsweetened with semi-skimmed milk
  - Bread/toast includes low fat, polyunsaturated spread
  - Vegetable oils have been used for cooking (rapeseed oil) and in salads (olive oil)

Free sugars are sugars that have been added by a food manufacturer, cook or consumer to a food and include those sugars naturally found in fruit juice, honey and syrups. They do not include sugars naturally found in milk and milk products, nor in fruit and vegetables.
